Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization
Qing Li, Yuliu Chen
Modeling and Analysis of Enterprise and Information Systems – From Requirements to Realization discusses the basic principles of enterprise architecture and enterprise modeling. After an introduction to the field the General Enterprise Modeling Architecture is presented. The new architecture includes a set of models and methods. It describes different aspects of the system and covers its life cycle. Its models are structuralized models with multi-layers and multi-views. They are descriptions and cognitions of the system at the top level and provide tools and methodology to understand, design, develop and implement the system. This book is intended for researchers and graduate students in the field of industrial engineering, management engineering and information engineering. Enterprise Models discussed in this book provide a rich source in enterprise diagnosis, business process reengineering and information system implementation. Dr. Qing Li and Prof. Yu-Liu Chen both teach at the Department of Automation, Tsinghua University.

From reader reviews:

Whitney Obrien:

Book is usually written, printed, or descriptive for everything. You can recognize everything you want by a guide. Book has a different type. As you may know that book is important issue to bring us around the world. Beside that you can your reading talent was fluently. A book Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization will make you to possibly be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think this open or reading a new book make you bored. It isn't make you fun. Why they could be thought like that? Have you looking for best book or suitable book with you?

Ellen Weiss:

The particular book Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization has a lot of knowledge on it. So when you make sure to read this book you can get a lot of advantage. The book was published by the very famous author. Tom makes some research just before write this book. That book very easy to read you can find the point easily after reading this book.

Lula Barnes:

Are you kind of stressful person, only have 10 or even 15 minute in your day to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are receiving problem with the book when compared with can satisfy your limited time to read it because all this time you only find reserve that need more time to be study. Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization can be your answer because it can be read by anyone who have those short free time problems.

Donna Willeford:

Book is one of source of expertise. We can add our understanding from it. Not only for students but native or citizen need book to know the change information of year for you to year. As we know those publications have many advantages. Beside we all add our knowledge, also can bring us to around the world. By the book Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization we can get more advantage. Don't that you be creative people? For being creative person must prefer to read a book. Only choose the best book that acceptable with your aim. Don't possibly be doubt to change your life with that book Modeling and Analysis of Enterprise and Information Systems: From Requirements to Realization. You can more inviting than now.
