Talk of the town: A landmark in urban mapping

More than four centuries on from its first publication, discover one of the **jewels of urban cartography and civic studies**. This quality reprint includes the most enchanting color plates from the *Civitates orbis terrarum*, a magnificent collection of town map engravings, produced between **1572 and 1617**.

Featuring **plans, bird's-eye views, and maps for all major cities in Europe, plus important urban centers in Asia, Africa, and Latin America**, this masterwork in urban mapping gives us a comprehensive view of city life at the turn of the 17th century. It was edited and annotated by theologian and publisher **Georg Braun** and largely engraved by **Franz Hogenberg**, but also involved over a hundred different artists and cartographers who contributed not only town views, but additional elements, such as figures in local dress, courtroom scenes, and topographical details, to help convey the **situation, commercial power, and political influence** of each city.

TASCHEN's reprint contextualizes the plates with selected extracts from Braun's original texts on the **history and significance of each urban center** as well as detailed commentaries to place each city map in its **cartographical and cultural context.**
