The Magnetic Compass: A By-Product of Magnetized Hand Tools (Offcuts from the Forge Book 7)
David Sim
This is one of a series of short accounts of experimental archaeological work undertaken on generally neglected areas of ancient life. In each case, a problem is defined and various practical solutions tested and assessed. It is in the nature of experimental archaeology that no definitive answer can ever be provided, but each of these probable or possible explanations can be evaluated.

This ebook deals with how metal workers' tools can be used to magnetize thin iron wire and thin sheet iron, which can then be used as a magnetic compass.
