Satellite Networking: Principles and Protocols Zhili Sun

"This book provides up to date coverage of the basics of ATM and internet protocols, and characteristics of satellite networks and internetworking between satellite and terrestrial networks"

"Satellite Networking: Principles and Protocols, Second Edition" provides up to date information of the original topics in satellite networking and protocols focusing on Internet Protocols (IP) over satellites, broadband over satellites, next generation IP (IPv6) over satellites, new generation of DVB-S/S2 and DVB-RCS next generations and new services and applications. It also includes some analytical techniques for evaluation of end to end IP performance and QoS over satellite, reflecting the recent convergence of telecommunication, Internet, broadcasting and mobile networks.

Topics new to this edition: Internetworking with MANET, DVB-S/S2 and DVB-RCS/RCS2 (including TCP/IP over DVB-S/RCS), recent developments in broadband satellite systems, convergence of services and network technologies (including Internet, telecom, mobile, TV, etc.), radio resource management, PEP, I-PEP, SCPS, traffic modelling and engineering with analysis and examples, and future developments of satellite networking. Provides up to date coverage of the basics of ATM and internet protocols, and characteristics of satellite networks and internetworking between satellite and terrestrial networks (e.g. mobile ad hoc networks), including coverage of new services and applications (e.g. Internet, telecom, mobile and TV) Discusses the real-time protocols including RTP, RTCP and SIP for real-time applications such as VoIP and MMC, and explains TCP/IP over satellite and evolution of IPv6 over satellite and beyond

From reader reviews:

Yvonne Casey:

What do you regarding book? It is not important along with you? Or just adding material when you want something to explain what the one you have problem? How about your time? Or are you busy individual? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Every person has many questions above. The doctor has to answer that question simply because just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on jardín de infancia until university need this specific Satellite Networking: Principles and Protocols to read.

Brian Mejia:

Here thing why this particular Satellite Networking: Principles and Protocols are different and trusted to be yours. First of all examining a book is good nevertheless it depends in the content of the usb ports which is the content is as delicious as food or not. Satellite Networking: Principles and Protocols giving you information deeper and in different ways, you can find any guide out there but there is no guide that similar with Satellite Networking: Principles and Protocols. It gives you thrill looking at journey, its open up your own personal eyes about the thing that happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in playground, café, or even in your approach home by train. Should you be having difficulties in bringing the paper book maybe the form of Satellite Networking: Principles and Protocols in e-book can be your alternative.

Ruby Chartrand:

Spent a free time for you to be fun activity to perform! A lot of people spent their leisure time with their family, or their very own friends. Usually they carrying out activity like watching television, likely to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your own personal free time/ holiday? Could be reading a book might be option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the book untitled Satellite Networking: Principles and Protocols can be very good book to read. May be it could be best activity to you.

Ann David:

A lot of people always spent their free time to vacation as well as go to the outside with them household or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. In order to try to find a new activity that's look different you can read a new book. It is really fun in your case. If you enjoy the book that you simply read you can spent the whole day to reading a reserve. The book Satellite Networking: Principles and Protocols it is quite good to read. There are a lot of people that recommended this book. They were enjoying reading this book. When you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore easily to read this

book from your smart phone. The price is not to fund but this book features high quality.
