Malfunction

“This is the future, then.” “Life is full of surprises.”

Those are the words of a malfunctioning android to Lieutenant Everett Monson. All Everett wants is to fix his fighter ship. But the android is not going to let him do it in peace.

The android believes it is Marcus Wolasky, the father of spaceflight and famous war pacifist. But Wolasky died years ago. Is it possible that he time travelled into the future to see how his theories have been developed?

Everett believes the android has been programmed as a prank. He tries to deactivate him but it’s no use. All that’s left to do is to order a technician to wipe the android’s memory. Whilst Everett waits for the technician to appear, the android continues to ask Everett about humanity’s expansion into the universe. And the more he discovers, the less he likes what he hears.

Malfunction is a time travel tale of salvation with an important message about war. Jennifer Campbell-Hicks spins a philosophical examination about causality and the origin of brutality in the universe. This is wish-fulfillment science fiction at its finest and will leave you yearning for more.
