Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications

Tawfik Abdo Saleh, Vinod Kumar Gupta

Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications Tawfik Abdo Saleh, Vinod Kumar Gupta

Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications presents a unique collection of up-to-date polymeric nanomaterial membranes. The book offers a perfect source to document state-of-the-art developments and innovations in nanocomposite membranes, ranging from materials development and characterization of properties to membrane applications.

The book discusses applications that encompass the enhancement of sorption and degradation processes and their usage for the removal of different pollutants, including heavy metals, dyes, pesticides, and other organic and inorganic pollutants from the industry.

- Presents a powerful single source for the development of new, rapid, and highly efficient membrane composites
- Offers a perfect source to document state-of-the-art developments and innovations in nanocomposite membranes, ranging from materials development and characterization of properties to membrane applications
- Covers applications in membrane science, water treatment, and the removal of pollutants from waste water
- Provides theoretical and practical information about the synthesis and application of polymeric nanocomposite membranes
- Includes instructor support material available at textbooks.elsevier.com

From reader reviews:

Harriett Costello:

The book Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications make one feel enjoy for your spare time. You need to use to make your capable much more increase. Book can to become your best friend when you getting tension or having big problem along with your subject. If you can make studying a book Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications being your habit, you can get much more advantages, like add your own personal capable, increase your knowledge about several or all subjects. You could know everything if you like wide open and read a e-book Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications. Kinds of book are several. It means that, science publication or encyclopedia or others. So , how do you think about this guide?

Judy Brewer:

Reading a e-book tends to be new life style with this era globalization. With looking at you can get a lot of information that will give you benefit in your life. With book everyone in this world could share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire all their reader with their story or perhaps their experience. Not only the storyplot that share in the books. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors these days always try to improve their expertise in writing, they also doing some investigation before they write on their book. One of them is this Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications.

Edward Roth:

You may spend your free time to learn this book this book. This Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications is simple to develop you can read it in the park, in the beach, train along with soon. If you did not get much space to bring typically the printed book, you can buy the particular e-book. It is make you much easier to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Terry Klatt:

With this era which is the greater individual or who has ability to do something more are more important than other. Do you want to become one among it? It is just simple approach to have that. What you have to do is just spending your time almost no but quite enough to experience a look at some books. On the list of books in the top checklist in your reading list is usually Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications. This book and that is qualified as The Hungry Slopes can get you closer in getting precious person. By looking upward and review this book you can get many advantages.
