Understanding Thinking: Maps Models Meanings Goals Motivation and Neural Networks: The Biological Roots of the Tree of Knowledge (Kew Concepts Book 1) John Evans
This book explains how our pre-conscious experience-trapping neural networks, `generalise? and `abstract? from a stream of personal and cultural experiences, to construct our causal maps and models of reality, our value systems and our emotional associations. It explores the strengths and weaknesses of human thinking and language, and shows how we can take conscious control of our personal development, updating old and dysfunctional models of reality to take account of new experiences and changed circumstances. It presents a powerful new Graphical Thinking Tool that everyone can use, individually and in groups, to explore and understand the deep structure of any problem, any system and any body of knowledge. Understanding may be unfashionable, but it is still `the ultimate study skill?.
