Analysis of Structures

Mohamed Abdel-Rohman

Analysis of Structures Mohamed Abdel-Rohman
This textbook is for the undergraduate and the first year graduate students in Civil Engineering Departments. The book is used in teaching three courses in structural analysis. The book offers the classical and modern matrix methods for the analysis of the statically determinate and statically indeterminate structures. The book enables the student to understand the topics of the three courses by including 180 examples solved by different methods. This will enable the student to understand the advantages and disadvantages of each method.
